BIO

Space Chimney blasted off November 2019, shortly after discovering the melancholic nostalgia of vaporwave. It started when multi-instrumentalist / writer / producer Some Body got together with vocalist No Body (they're married so they share the family name). Their band is based on Long Island, New York.

Space Chimney's music is heavily sensitive to rock sounds and electronics, associating at times with soft and intimate arrangements. Their animating sounds are something nostalgic – but invitingly unfamiliar.

Working with a blend of live instrumentation, vocals, and samples, Space Chimney aims to bring their music to the stage in 2020.
